## **A List of Awesome Books**

## ***Forward***

A Druid and a Witch got together and decided to write a book. They wanted something fresh and different to what was already out there. They wanted a practical magic spell book that didn't include the basics (such as how to cast a circle, how spells work, etc.) and that didn't include any religion or ethics. This is how SpellCast was born.

This book has been designed for intermediate to advanced magical practitioners. It has tried and tested spells that work; with some that will stand the test of time. The spells are organised into categories for ease. The magic is essentially folk magic.

We have used magic in many different ways, including: in baths, candles, chants, charms, colour, cords, crystals, elemental magic, calling upon Gods & Goddesses, magic squares, nature magic, oils, incense, planet and star magic, ritual, talismans, poppets, Ogham script, witch bottles, and visualisation.

We have designed each Spell to deal with 21st century problems and done our best to make sure that all ingredients are easily available. In the event that you can't get hold of an ingredient, check the last page of the

chapter for a table of correspondents that will list suitable substitutes.

We hope you find this book fun, informative and above all effective in achieving your desired results.

Brightest Blessings,

### **About Us**

Luna Hare is in his 50s and has been a practising pagan since his late 20s, but he has always had magic in his life. He was initiated into a coven in the early days of him coming out as a witch and is still in contact with the original group. After learning his craft with the group, he found the rigidity of the Wiccan path too restricting so looked for other alternatives. It was here he came across Druidry and joined the OBOD (Order of Bards, Ovates and Druids) where his creativity and free spirit felt more at home.

Luna has since become a more spiritual and grounded pagan and feels that too much focus on the religion is not always necessary. Luna now classes himself as a Wise Man with knowledge of many of the different aspects of paganism. Luna specialises in crystals, aromatherapy, healing, rituals, blessings, fertility, poppets, poetry, talismans, charms and nature magic.

Antony Simpson is a Witch who has been an eclectic pagan for over 18 years. He has worked as both a solitary practitioner and in groups. Antony is good at instant magic and being the darker practitioner of the two, naturally leans towards banishments & bindings, spells around material gain, healing and protection.

Types of magic that Antony specialises in include: candle magic, chants, charms, colour, crystals, elemental magic, invocation of gods and goddesses, nature magic, oils, rituals, visualisation and witch bottles.

## *Instant Magic*

For quick, instant, results. For when there is no time like the present for manifestation. These spells require no preparation and are effective whenever they are cast. As such there are no correspondences for these spells.

### **Car Parking Space Chant**

When it is difficult to find a car parking space, repeat this chant until you find a space, which will be soon:

*Powers of Earth, Sea and Sky,  
Find me a parking space that's close by.*

### **Lost Items Chant**

Repeat this chant until you find your lost item:

*I call upon the spirits of things that disappear.  
[name of object] I wish to find,  
So help me now out of this bind.  
So must it be.*

Be sure to thank the spirits when you find your lost item. Say something like:

*Spirits I thank thee for your time, with this simple little rhyme.*

### **To Slow Time**

Running late? Look at a clock or watch and visualise the second hand move slower and slower, ticking by much slower than usual. Then say:

*Janus, keeper of time, here my plea,  
Slow time until I get to where I need to be.*

Or if you need more time to get something done, use the same visualisation but adapt the words. Say:

*Janus, keeper of time, here my plea,  
Slow time until my task completed be.*

### **Mirrored Psychic Protection Bubble**

If you ever find yourself under psychic attack, close your eyes and visualise a protection bubble. On the outside visualise the surface of your protection bubble as mirrored. A reflective surface deflecting negative energy back to its sender. You'll find that the attack soon stops.

If it doesn't strengthen the protection bubble with energy from the universe; visualise a beam of energy coming down from the stars and strengthening your psychic protection bubble making it strong and impenetrable.

It might be worth revisiting your self-protection. See the Protection chapter of this book.

## **Physical Protection Bubble**

The best way to avoid harm is to prevent it. This exercise should be undertaken daily, so that when you need it the most, you're able to throw up a good protective bubble.

This physical protection bubble is to be used as a last resort. The time to use it, is in the moments when time slows right before an accident or incident and nothing else can be done.

For example, Antony once used this when a car came round a blind corner at 40 MPH and Antony was crossing the road. Time slowed. Antony wasn't going to make it out of the way of the on-coming car. The driver hadn't even seen Antony yet. The driver was speeding and not paying attention.

Antony used this protection bubble, casting it outside of his aura and the car hit it. The car was slowed by the impact and the driver then noticed Antony and slammed hard on his breaks. All this time Antony kept moving and he managed to be just inches over to the other side of the road, so that the car just missed him. Antony would probably be dead if it wasn't for the few seconds of time his physical protection bubble had bought him.

This visualisation is a simple one. Imagine a bubble of green energy, strong and impenetrable around you. Make it thick and put the bubble outside of your aura, which can be several feet away from your body.

Everyday add more energy to this bubble through

repeating the visualisation. Be confident in knowing that when you need it, you'll be able to call upon the bubble of physical protection.

### **Energy Balls**

Place your first two fingers of both hands facing one another a couple of inches apart. Visualise energy flowing between them making a sphere that slowly increases in size. As this energy flows and builds give it a purpose with your mind. Visualise the energy ball setting to work and the task being complete. When you feel that enough energy has been raised you can release the energy ball or throw it (depending on your intention) and it will go to work instantly. This is great for any sort of Spell involving technology.

For example, a slow computer, tablet or smart phone can be sped up by charging an energy ball and then releasing it onto and into the computer.

### **To Keep Warm in Cold Weather**

Run your hands together until they are warm. Visualise yourself being stood in a red walled protection bubble with the red walls being that of flames. Bring this bubble in close to your physical body. Feel the heat on any exposed skin, I.e., hands, face. Etc. Say these words of power:

*Powers of fire and flame,*

*Make me hot, this is my aim.  
As hot as the sun on a summer's day,  
Do this now without delay.*

The reverse can be done if you feel too hot. Visualise yourself being stood in a yellow walled protection bubble with the yellow walls being walls of cool air. Bring this bubble in close to your physical body. Feel the cool air on your exposed skin, hands, arms, face, etc. Say these words of power:

*Powers of air around me,  
Cool me down I ask thee.  
As cool as a fresh breeze on an autumn's day,  
Do this now without delay.*

## **To Make a Computer, Tablet or Smartphone Run Quicker**

1. Restart your computer or device and as it reboots say:

*Powers of Earth, Sea, Wind & Sky,  
Make this device quick and fly.  
Not a moment of wasted time there shall be,  
Let this device be all that it should be.  
So mote it be.*
